

MOTIVATEXR

Maintenance, Support & Operation Training using Immersive Virtual and Augmented Technology for Efficiency with XR

MOTIVATE XR is developing a user-friendly suite of XR tools that allow anyone to create and use collaborative digital content - no programming skills required. Our co-design approach makes industrial tasks safer, more accessible, and more engaging across Europe.

Our 5 Complimentary Pilots

Aerospace  Streamlining safety-critical maintenance with digital mock-ups.	Home Appliances  Accelerating assembly-line training and quality control.	Aluminium  Powering high-precision manual training with AI-driven XR.
Energy  Modernising high-risk field services and remote assistance.	Manufacturing  Optimising human-robot interaction through digital twins.
